

Basic Seminar

SPECTRUMA GDA 150 HR/ 650 HR and GDA 550 HR/ 750 HR series

The training course is aimed at people who want to learn the routine work and the preparation of analytical methods with the glow discharge spectrometer

Beginners and users who already possess the first experience in this area can deepen basic knowledge and expand their analytical skills and software knowledge.

The daily routine in this course will be both theoretically and practically reconstructed. The skills learned here form the basis for a fast, trouble-free measurement process and the continuous safety in analysis.

Training content:

- Fundamental terms of Glow Discharge Optical Emission Spectroscopy (GDOES)
- Structure and handling of the GDA
- Handling of the software in conjunction with the spectrometer
- Process and evaluation of the calibration
- Daily routine applications
- Evaluation of analytical results
- Error detection in the analysis of unknown samples
- Creation and adjustment of methods
- Working with the universal sample unit (USU)
- Sputter rate correction: Where you have to use it?
- Determination of detection limits
- Maintenance instructions, meaning of error messages, data backup
- Sample preparation
- Troubleshooting analyses of unknown sample
- Presentation of new developments and applications
